

Nuros announces an innovative multi-port adapter for the HQS introducer sheath kit, allowing up to three 9F systems to be used simultaneously through a single entry site.

## H. Q. S. X-Cath

### Multi-port adapter

*...at last a convenient method of access for complex endovascular procedures*

The **H.Q.S. Implant Sheath\*** has been designed to achieve effective sealing at each stage of thoracic and abdominal aortic endo-vascular procedures. It minimises blood loss and is extremely convenient to use with single-handed action. Used in conjunction with HQS, the X-Cath cleverly allows convenient and tidy access of up to three devices through the same entry site whilst controlling blood loss. Each device may be up to 9F in size

\*see separate information leaflets

#### **CX Innovation Prize:**

Dr Claude Mialhe won the Innovation Showcase at the Charing Cross Symposium in April 2011 for his presentation on using the HQS introducer with X-Cath for complex Endovascular procedures

#### **Ordering information:**

Product code: XCATH3
