See special offer prices below

Applies to orders placed by 30th June 2012.

Simply quote 'doppoffer' when ordering

Our prices include choice of probe, batteries, carrying case and delivery within UK.

Now with 2 year guarantee.

The popular and robust hand-held LifeDop™ range from Nuros offers a wide choice from simple non-display models, to those with display, rechargeable batteries and audio-recording. New chip technology has eliminated gel noise and together with superior sound design helps create the highest quality and most sensitive Doppler. A built-in battery management system increases battery life by over 400% from the traditional Doppler. LifeDop™ was the first Doppler to offer the option of built-in audio recording allowing play-back to colleagues, downloading to email or permanent storage. Batteries are the readily available AA size and even the connecting cable can be conveniently replaced using standard 'phone cable connections. All products carry a full two-year warranty.

Each Hand-held Doppler comes with a choice of 4, 5 or 8 MHz probes included in the price, with 8 MHz being the most popular for general vascular use.

Cat. No	Vascular Dopplers—Descriptions	Price (£) ex. VAT	Offer Price (£) ex, VAT
