

E-XL[®]

Aortic Stent

- Self expandable nitinol stent for the treatment of lesions of the thoracic aorta and vena cava especially in case of dissections or stenoses but also for endograft repair
- Special stent design featuring flared ends for optimal vessel fixation
- 5 Tantal markers at each end of the stent for excellent visibility
- Two different stent lengths and various diameters to match individual vascular anatomies
- Delivery system as from 12 F, usable length of 950 mm
- Squeeze-to-Release[®] deployment mechanism for controlled and precise positioning
- Compatible with 0.035" guide wire e.g. JOTEC E-wire
